## 2025

CATALOG

# Welcome.....

to Spyder Manufacturing's 2025 Sales Catalog. We hope that you can take a couple minutes to review our product offering.

While looking toward the future, we wanted to take this opportunity to explain a little of who Spyder is.

Spyder Manufacturing took its shape from the blending of two Southern California companies focused on the lawn & garden industry. One company specialized in the manufacture, assembly, and distribution of metal lawn and garden hand tools. Founded in 1991, this company's product line included the lopping shears, hand pruners, and rakes that you still see in this catalog.

The other company's core business was in the manufacturing, assembly and distribution of commercially sewn products. With this company's origin dating back to the 1970's, the product line consisted of commercial truck tarps, lawnmower bags, and sweep catchers. In addition to these products, this company had an extensive and diverse background in the construction of tooling, dies, and templates with the capabilities of far more.

In 2002, with the acquisition of a new 19,000 sq. ft. facility in Placentia California, the joining of the two companies was completed. Combining the experience and expertise of these two diverse enterprises resulted in the formation of Spyder Manufacturing, named for its expanding web of product offerings:

- The Climb Right brand of professional arborist equipment and supplies.
- The Phoenix Tools brand of high quality hand tools including Phoenix Easy Rakes, hand pruners, loppers, cultivators, etc.
- The Falcon Bags brand of quality commercially sewn products such as aftermarket Falcon Lawnmower Bags and Falcon Custom Truck Tarps.

With over 100 years of combined manufacturing, design, sales, and marketing experience, Spyder Manufacturing has evolved into a full functioning, solar powered, state of the art manufacturing facility. Today, utilizing our capabilities of 3-D printing, plasma cutting, laser cutting and marking, CNC machining, CNC sewing, etc. we can develop a product all the way from concept to finished goods. These capabilities have enabled Spyder Manufacturing to expand our "web" to such products as: Climb Right's exclusive patented Ultra Lightweight Aluminum Climbers, rope grabs, wire core lanyards, climbing and work positioning saddles, and custom sewn rope products for the professional arborist. Phoenix brand Lightweight Fiberglass Pole Pruner Systems featuring the Phoenix Pruner Head, Ultra Lightweight Carbon Fiber poles, etc.

As we go forward, Spyder Manufacturing will continue to look for ways to integrate the latest technologies to address the future challenges that *our industry presents*.

## TERMS & CONDITIONS

**Terms:** The term “Customer” includes business customers, government entities, institutions, and individuals. By placing an order, Customers accept and agree to Spyder Manufacturing, Inc.’s Terms of Sale, of which the full text may be found at [www.Spyderman.com](http://www.Spyderman.com) and are incorporated herein by reference. Spyder Manufacturing, Inc. reserves the right to: (i) revise the Terms of Sale as found on [Spyderman.com](http://Spyderman.com) at any time; and (ii) accept or reject any order or portion of any order. In case of conflict, inconsistency, or discrepancy between these Terms and Conditions and the terms and conditions contained in any document submitted by Customer, these Terms and Conditions shall govern even if Customer’s document expressly limits acceptance to Customer’s terms and conditions.

**Prices:** The prices displayed are in USD and are current as of April 10, 2025, and may have changed. Prices do not include freight, handling fees, taxes, and/or duties and are subject to change or correction at any time and without prior notice. Export prices may be subject to different pricing.

**Sales Tax:** Customers are responsible for payment of all applicable taxes or providing a valid sales tax exemption certificate.

**Shipping Charges:** Shipping charges, which may include surcharges and additional fees, are subject to change without prior notice. Products are shipped F.O.B. our warehouse, Placentia, CA. Some shipments may qualify for prepayment of standard freight charges due to qualifying purchase, however only products manufactured by Spyder Manufacturing will apply towards qualifying purchase amount. For a list of non-qualifying products, or non-standard freight charges, contact Spyder Manufacturing. Fees, charges, surcharges and other terms and conditions may apply for drop shipments, freight collect, special handling, oversize shipments, non-standard shipments, and/or shipments outside the contiguous United States. Title and risk of loss pass to the Customer upon tender of shipment to carrier. For Spyder Manufacturing’s current policy for prepayment of freight charges, email: [info@Spyderman.com](mailto:info@Spyderman.com) or call (714) 528-8010.

**Shipping Loss or Damage:** Immediately upon receipt of merchandise, report all claims for losses or damage in shipment directly to the delivering carrier. Delays may cause you a loss. Claims made after 7 days from receipt of shipment will not be accepted.

**Payment Terms:** Spyder Manufacturing, Inc. accepts cash, checks, ACH, money orders, Visa, MasterCard, Discover, and American Express. Visa, MasterCard, Discover, and American Express payments may be subject to additional fees for processing. Spyder Manufacturing, Inc. reserves the right to refuse acceptance of checks or money orders for any reason. For Customers with established credit with Spyder Manufacturing, Inc., payment terms are net 30 days from the date of shipment or pick-up. If payment is not received within the 30-day period, Spyder Manufacturing, Inc. may cancel or defer all or part of any order or shipment. Accounts past due may be charged 2% each 30 days after the 31st day of invoice date. Payments including volume discounts after their due date will be credited as partial payment with the balance owing.

**Product Specifications & Substitutions:** Product specifications, including country of origin, and/or certifications may change without prior notice. Catalog images are for illustrative purposes only. Products may be substituted and may not be identical to images and/or descriptions on [Spyderman.com](http://Spyderman.com) or in the Spyder Manufacturing, Inc. catalogs, brochures, or other publications.

**Product Returns:** All returns must receive pre-approval from Spyder Manufacturing, Inc. Non-warranty returns must be in original packaging, unopened, unused, undamaged, in saleable condition, and may be subject to a 20% restocking fee. Custom Truck Tarps, special orders, burlap sheets, poly sheets, and trash bags are not returnable.

**Limited Warranty:** Goods not manufactured by Spyder Manufacturing are covered by their own limited warranty with their own terms and conditions from the manufacturer of those goods. Spyder Manufacturing, Inc. warrants that the goods manufactured by Spyder Manufacturing, Inc. shall be free from defects in materials and workmanship for a period of 90 days from the date of delivery to Customer, with the following exceptions: Spyder Manufacturing’s limited warranty does not cover: normal wear and tear, products that have been abused, misused, or neglected; products that have been used in a manner not consistent with manufacturer’s instructions; products that have been altered or modified; items that have been subject to shock loading; Vacuum Bags, Lawnmower Bags, Truck Tarps, Hauling Tarps, Burlap Sheets, Poly Sheets, and Trash Bags. For warranty claims, contact Spyder Manufacturing by email at: [info@Spyderman.com](mailto:info@Spyderman.com). All warranty claims require proof of purchase and pre-authorization. Transportation costs are not covered by the limited warranty and are the responsibility of the Customer. Upon receipt and evaluation of the defective product to Spyder Manufacturing, if the product is found to be defective in materials or workmanship, then the product will be repaired or replaced, at Spyder Manufacturing’s sole discretion.

**Catalog Information:** Spyder Manufacturing makes every effort to provide accurate information to our Customers. Some of the information contained in this catalog is supplied by the manufacturer and/or supplier. Changes to the product data may occur. For these reasons, the accuracy of the information contained in the catalog cannot be guaranteed. Prices were accurate as of April 10, 2025 and are subject to change without prior notice. Some items are for use only by properly trained professionals.

## Honey Badger Climber

Introducing Climb Right's latest aluminum climber, the Honey Badger. Designed, machined, and assembled in the USA. Honey Badger Climbers feature lightweight contoured cuffs and climber shanks made of USA made aluminum. The climber set weighs 5.2 pounds per set, including the integrated tool kit. 350lb weight limit including person and gear. Shipped fully assembled in an appealing, full color box that prominently displays its key features. The retail box makes it ready to be displayed in the showroom.

**FOAM CUSHION:** 86 square inches of surface area offering maximum comfort and support; Molded construction featuring built in ventilation channels for air circulation; washable and replaceable

**ALUMINUM CUFF:** Lightweight aluminum form fitting cuff; Height adjustable from 16" to 20"; Angle adjustable to either 7 ° or 10 °

**UPPER STRAP:** 4" wide, replaceable and infinitely adjustable using a hook and loop fastener for a comfortable and snug fit

**TOOL POUCH:** Integrated tool pouch located in the upper strap containing Allen keys for pad adjustment and gaff replacement

**ALUMINUM HOOK:** 7075 Aerospace grade aluminum formed into an ergonomically shaped "J" hooks. Hardened for strength and durability and anodized for an attractive durable finish

**LOWER STRAP:** Rounded stainless steel ring to reduce wear on climber tip

**GAFFS:** Flame hardened gaff tips to keep its edge longer. Available in two lengths: 2-5/8" long for trees; 1-5/8" long for poles and palms

Description	Part #	MSRP
Honey Badger Tree Climbing Spikes	91235	\$ 499.00
Honey Badger Pole Climbing Spikes	91275	\$ 499.00

QC Climb Right Tree Gaff Set	90040	\$ 99.08
QC Climb Right Pole Gaff Set	90042	\$ 99.08

**ULTRA LIGHT PADS:** The made in USA Ultra-Light Pad Assembly features a rigid aluminum upper cuff. While typical climbers require a separate sleeve to attach the pads to the cuff, our cuff has an integrated sleeve to eliminate the weight of a separate sleeve. The cuffs are formed in our factory, hardened, and then coated with its attractive green hammer-tone finish. The hook and loop fastening system for the replaceable and washable pads offer numerous ways to position the pad on the cuff for the most support and comfort while climbing. Made in the USA, these pads have ventilation channels to increase the air circulation. The comfortable three-inch-wide upper straps are sewn onto each Ultra-Light pad. The hook and loop fastening allows for fine adjustment that can't be matched by a standard belt and buckle.

**CLASSIC 2 PIECE CLIMBER:** Climb Right's exclusive two-piece climbers feature a patented design that provides strength and light weight. The shank starts with precision milled USA made aerospace grade aluminum. The "J" hook is made of extruded USA aluminum, precision milled to join perfectly with the shank. The two halves are triple riveted with aircraft grade fasteners. Designed, machined and assembled in our factory in Placentia, California.

Available in many styles and configurations of pads including Climb Right's classic soft pads including "L", "T", and Super Pads.

**GAFFS:** All Climb Right climbers also include Climb Right's "Quick Change" style gaffs. These forged gaffs employ a rapid change 2-screw design, enabling the operator to switch or replace the gaffs with ease.

**GRIP STRIP:** Another feature of the Climbers is the dual purpose "Grip Strip". This exclusive grip strip provides added traction while walking on tree limbs, and doubles as a wear strip to inform you when it is time to replace your J Hooks.

**WARNING:** Climbing trees is a hazardous activity. Only properly trained professionals using the best safety techniques should use this equipment.

## STAINLESS STEEL SPLIT RING

Part # 85023  
Replacement Steel Ring  
for Lower Strap Set.  
Sold as sets of 2 pieces.

# CLIMB RIGHT

A Division of Spyder Manufacturing Inc.

**CLIMB RIGHT SOFT PADS:** Climb Right Pads "L" Pads, "T" Pads, and Super Pads, are all sewn in our factory in Placentia California, using state of the art computer controlled sewing machines for precision sewing. Constructed of durable synthetic materials, these pads are more weather resistant than leather. Compatible with Climb Right Climbers (except for Honey Badger Series Climbers), as well as many other manufacturers' models.

## SUPER PAD - 85012:

Feature the most comfort and support for our sewn pads, due to their enlarged area for most "wrap". Two pairs of upper straps provide a snug fit for upper and lower shin and calf.

## L PAD - 85010:

Feature a special cut slot for our steel sleeve strap loop. They are a popular choice for their light weight and value.

## T PAD -

**85011:** A great choice for arborists that like the light weight of the "L" pads but need a little more "wrap" for comfort and support. Climb Right "T" pads feature the die cut slot for our steel sleeve strap loop.

Standard - Part # 90070  
Extra Long - Part # 90071

**CLIMB RIGHT ULTRA LIGHT PAD:** Feature our patented design. We start with USA made aluminum formed into a rigid cuff for maximum support. The cuff has an integrated sleeve, eliminating the weight of a separate steel sleeve. The replaceable USA made foam cushions have been designed for maximum comfort. The three-inch wide strap with hook and loop fasteners allows infinite adjustment for a snug, comfortable fit. Comes in either Standard (most common and as pictured to the left) or Extra Long, which features a longer sleeve typically meant for taller climbers.

**Ultra Light Replacement Cushion Set**  
Part # 90120

## Climb Right Wire Core Lanyards

Spyder Manufacturing utilizes hydraulic presses to crimp our Climb Right wire core lanyards twice at each termination. The first crimp secures the wire core around the eye. The second crimp secures the outer rope cover to the wire core, while also eliminating the flex fatigue between the two crimps. This also prevents the rope cover from milking away from the terminations. This new process minimizes voids without injuring the wire core.

- Every Lanyard is Individually Load Tested to 650 lbs!!!
- Mostly made in USA apart from world sourced snaps
- ANSI Approved High Quality Double Locking Snaps
- Any Style of Lanyard can be Made to Any Size

*When Your Life Is On  
Our Lines, Your Safety Is  
On Our Minds!!!*

### Warning:

Never use wire core lanyards around power lines or high voltage equipment. Do not modify or repair; doing so voids warrant and can lead to serious injury or death. Read safety booklet for more information and warnings.

## Sewn Eyes with Ninja Sheath

Using computer controlled sewing machines for precision, Spyder Manufacturing's Ninja Splice eliminates the weight and bulk of traditional "crimping" methods while maintaining integrity and strength. Spyder Manufacturing utilizes this method for all the sewn spliced eyes on our Climb Right prusiks, synthetic core lanyards, and split tails. Together with our Ninja Sheath protective eye guard, we have created the perfect rope end. The very strong, wear resistant Cordura® sheath is added to the sewn spliced eye providing maximum protection and adding years to the life of your rope.

Description	Part #	MSRP
Ninja Spyder Splice	36040	\$ 16.54
Ninja Spyder Splice Both Ends	36042	\$ 27.56

**Razor Rope Cutter:** Designed to easily cut polyester or nylon ropes up to 20mm in diameter. Not for use on ropes made from Dyneema or Tecnora

**Mini-Reach Retriever:** Designed to assist in retrieving climbing or rigging lines that are out of reach. 180mm long when closed, 1 meter long when opened.

Description	Part #	MSRP
Razor Rope Cutter	SS-4900150001	\$ 32.00
Mini-Reach Retriever	SS-1H7002	\$ 25.59

## Shrink Tubing

### Key Features:

- Bonds to a variety of metals, rubber, rope, and plastic
- Shrink Ratio: 3:1
- Shrink temperature starts at 158°F (70°C) and completely shrinks at 257°F (125°C)
- Operating Temperature is about -50°F (-45°C) to 257°F (125°C)

## Gear Bags & Rope Bags

**70L & 90L GEAR BAG:** Made from durable PVC tarpaulin, this general purpose water repellent gear bag converts into a backpack with the included shoulder straps. It also features removable and adjustable shoulder straps, separate storage pocket in the top flap, compression straps, rubber haul handles on both ends and a windowed name holder pocket.

36152

36154

Both the 70L and 90L gear bags can be converted to a backpack style with the included shoulder straps

**VAULT 25 - 36142:** 25 Liter capacity storage bag. 4 internal plastic inserts to keep the bag upright when empty. Heavy duty carry handles, 1000-D Matt Tarpaulin material, Dual walled for extra strength, drawstring closure system, Drain eyelet in the base of the bag. Bag size: 300mm (Dia) x 400mm (H).

**VOYAGER 60 - 36148:** 60-litre backpack made from a durable 1000-D Matt Tarpaulin material. General-purpose water-repellent backpack fitted with 4 internal plastic inserts to keep the bag upright when empty. Large external storage pocket with heavy duty zip closure. External side pocket for storing a handsaw with a hook & loop securing system along with an expandable mesh external pocket. 3 gear racks on the outside of the bag for stowing karabiners etc. Padded adjustable Alpine Cut shoulder straps and heavy duty carry handles. Fitted with an internal draw string closure system to help separate gear and a top closure flap with heavy duty zip. This bag has been designed to accommodate up to 3 of the VAULT 15 Storage Bags inside.

**VAULT 15 - 36141:**

15-liter general purpose storage bag designed to fit inside the VOYAGER 60 Backpack. 1000-D Matt Tarpaulin material. Mesh panel for breathability. The VAULT 15 can accommodate up to 35m of 12.4mm Climbing Line or 45m of 11.7mm Climbing Line. Fitted with an internal ring to anchor your throw line. 3 Vault 15 bags fit into the Voyager 60 bag.

**75L CLOTH GEAR BAG - 36153:** Climb Right's 75 Liter Cloth Gear bag features tubular webbing handles and rip resistant fabric.

STEIN offers a variety of sizes and colors such as blue, orange, yellow, and red. Call for availability or to place a special order.

## Fiddle Blocks

The utilization of a mechanical advantage device is invaluable when controlling the lowering of limbs or pulling down trees. Used in conjunction with a secure anchor point, this compact system provides a 5:1 mechanical advantage.

### FIDDLE BLOCK SYSTEM - 85241:

- 1000 lbs working load limit
- Kit includes:
  - 1 Fiddle Block Assembly (85240)
  - 1 50' hank of ½" rope with a 2" sewn eye
  - Removable pin rope grab (85578)
  - 2 steel double locking carabiners (85324)

Description	Part #	MSRP
Fiddle Block Assembly	85240	\$ 444.68
Fiddle Block System	85241	\$ 641.03

### FIDDLE BLOCK ASSEMBLY - 85240:

- 1000 lbs working load limit
- Anodized aluminum
- Delrin Ball bearings
- Cleated block
- 2½ Sheaves

## Hardware Accessories

### CLIMB RIGHT SMALL RIGGING PLATE - 85270:

Commonly called the "Paw". Rated to 36kN. Made in USA

### ALUMINUM RINGS:

Forged Aluminum Ring. Rated to 25kN. Large Blue ring OD: 70mm (2.75"), ID: 46mm (1.81"). Small Gold ring OD: 54mm (2.12"), ID: 30mm (1.18")

Description	Part #	MSRP

3/4" TENSILE STRENGTH: 20,200 LBS		

## Rigging Slings

**RIGGING SLING (CHORIZO):** The 2" Low Friction Ring provides one of the largest surface area/ bend radius on your rigging rope, prolonging the life of your rigging line by putting less stress on the ropes fibers. Good to use with Pulleys and Porter Wraps. WLL: 3,780 lbs.

### DEAD EYE RIGGING SLING:

Tenex-TEC is a high-strength, low-stretch rope specifically designed with two ends per carrier. This construction allows more rope surface conformance to objects being lifted than standard single braid constructions. It is Samthane coated to enhance its wear life. Good to use with Pulleys and Porter Wraps.

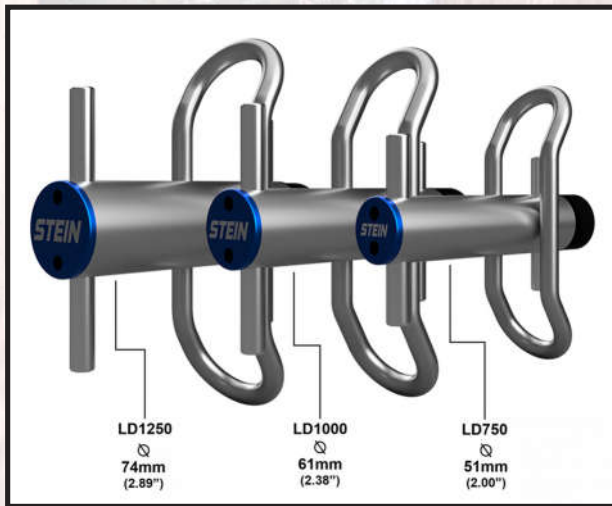

MBS for 5/8" - 15,000 lbs.

## Lowering Devices

**LD Devices:** The Invert-A-Wrap is a cost-effective rope friction device designed for lowering timber / objects from an elevated position in a controlled manner. The user-friendly design can be mounted in either orientation. Fitted with a tree protection rubber which can easily be replaced or removed and also covers the serial number for traceability for inspections. This Lowering Device comes in 3 sizes with varying WLL and Max rope diameter - See the chart below for comparison.

Model Number:	LD750	LD1000	LD1250
Max Rope Diameter:	13mm (1/2")	14mm (9/16")	16mm (5/8")
Working Load Limit:	750kg WLL (1650lbs)	1000kg WLL (2200lbs)	1250kg WLL (2755lbs)
Weight:	1.925kg (4.25lbs)	3.300kg (7.25lbs)	4.430kg (9.75lbs)

**RC-2001:** STEIN RC2001 Fixed Lowering Device 2000kg WLL. The RC-2001 is a medium duty single bollard lowering device. Weighing in at just over 5kg it can easily be mounted by one person by utilizing the top attachment point as a suspension point. Attached to the tree using a specially designed 5m 5t ratchet strap with 50mm webbing and backed up by securing a choked sling to the base anchor point. Fitted with the same diameter drum as the RC2000 this device can be

used with working ropes up to 16mm and has a working load limit of up to 2000kg (subject to mounting type)

**RCW3001:** (not pictured) is a larger version of the RC-2001 with a mounting location for the RCWINCH. RCW3001 WLL of 3000kg (6,600lbs).

**SMB1000:** This single bollard lowering device has a WLL of 1000kg and is designed to work effectively with ropes of up to 14mm. The SMB1000 is a single bollard lowering device. Weighing in at 4.3kg it can easily be mounted by one person by utilizing the top suspension point. Supplied with a specially designed ratchet strap fitted with Carbon Steel hooks with Keeper Pins to prevent the mounting hooks detaching from the device when not under tension. The webbing is made from a high tenacity 50mm wide polyester yarn and is UV resistant with a 6000kg breaking strength.

Honey Badger Saddle Large	83083	\$ 485.10

## STEIN

### Vega Plus VS2

#### Features:

- Large back support for increased wearer comfort
- Quick release waist buckle, centrally located for comfort
- Two large side "D" for EN358 Work Positioning
- Webbing loops mounted on the Bridge Rings (EN813)
- Aluminium bridge connection rings (Replaceable)
- Webbing bridge with proven durability
- Two bridge rings as standard - designed for Twin Rope Systems
- Large semi-rigid leg loops for comfort
- Elasticated Leg Loop Adjusters
- Quick-release leg loop buckles
- Three reinforced large Gear Loops
- 8 Small Webbing Loops (U-CREATE System)
- Two nickel plated gear rings
- Large rear Tool Strop mounting point
- Rear elasticated holder for first aid pouch

The re-styled VEGA PLUS VS2 Arborist harness offers all the great qualities of the original VEGA Harness along with increased features and styling. The VEGA PLUS VS2 is an industry proven harness with over a decade of history; durable, ergonomically designed, practical Work Positioning Harness. Supplied in ECO Packaging (No Plastics)

Sizing - Hip Circumference:

## Throw Weights

**THROW WEIGHTS:** Available in 8 oz, 10 oz, 12 oz, 14 oz, and 16 oz, Climb Right Throw Weights are made in the USA in our factory. We start with ballistic-quality weights sealed in a latex bladder for weatherproofing and energy absorption upon impact. Then it is encased in a Cordura outer layer. Each Cordura panel has been laser-cut in our factory for precision tailoring and to seal each edge to prevent fraying. The nickel-plated ring inhibits corrosion.

Description	Part #	MSRP
8oz Throw Weight	36011	\$ 18.71
10oz Throw Weight	36010	\$ 18.71
12oz Throw Weight	36005	\$ 18.71

150' Throw Rope	36009	\$ 20.84

# STEIN

## Throw Line and Storage Cube

**Economy Line:** Produced from 100% Polyester Fiber with a single braid construction this bright orange 2.0mm line gives an average strength of 90kg.

**Professional Line:** STEIN Skyline throw-line is manufactured from UHMWPE which stands for Ultra-High Molecular Weight Polyethylene, otherwise known as Dyneema. Available in three different sizes ranging from 1.5mm to 2.2mm with average breaking strengths ranging from 250kg to 450kg (1.5mm = 250kg | 1.8mm = 350kg | 2.2mm = 450kg). This line has an 8-strand flat construction which allows it to store neatly and when deployed reduces the nesting issues associated with inferior lines.

**Throw Cube:** The STEIN Folding Cube is the ideal storage solution for your throwlines. From a 44cm cube to a flat triangle pouch in seconds. The heavy duty full stretch base material increases the strength and is waterproof resistant. Two corner web loops to place your feet on when opening. Two small internal pockets for locating your weights and hardware. Use either the internal ring or velcro strap to anchor different lines.

Description	Part #	MSRP
2.0mm x 50m Economy Throw Line	SS-3612055050	\$ 17.06
1.5mm x 50m SKYLINE - Hot Pink	SS-3641544050	\$ 34.13
1.8mm x 50m SKYLINE - Yellow	SS-3641866050	\$ 37.54

Folding Cube for Throwline Storage	SS-5033272001	\$ 60.38

**STEIN SKYLAUNCH** is designed to deploy a throw weight and line over a tree limb so a friction saver or climbing line can be positioned. A vertical distance of 30m plus (100-feet) can be achieved with great accuracy when mounted on 3 x 76cm Poles, a higher distance can be achieved when mounted on 2 x 120cm poles (subject to Line and Weight used).

The STEIN SKYLAUNCH kits are available. Call for pricing and configurations. Compatible with STEIN, Phoenix, Jameson, and Marvin extension poles.

Description	Part #	MSRP
SKYLAUNCH Line Launcher	SS-4930100005	\$ 120.00
SKYLAUNCH Replacement Rubber	SS-4930100006	\$ 60.00

The **STEIN Knee Ascent System** is a simple but effective kit of components which helps assist you in ascending your climbing system easier and faster. Designed to work in conjunction with a foot ascender, it can be used in either double rope systems (DRT) or in single rope systems (SRT). The knee ascender captures the advancement made by your foot ascender. Not for use as PPE.

In addition to this kit you will require a STEIN CAMBO Foot Loop as seen to the right.

Kit Includes:

- 1 x SS-4922970001 STEIN Ascender
- 1 x SS-5533067030 STEIN YD Sling
- 2 x SS-1H0003 STEIN Karabiner
- 1 x 1m Black Bungee Cord (cut to user size)

**X25 VENTOUT Hi-Viz:** This high visibility work shirt is manufactured from X25 VENTOUT material which is 100% Polyester knitted fabric with a wicking treatment (130gsm). The reflective stripes have a performance wash cycle of 25 washes. (Always refer to the label before washing). The X25ventout is fully CE certified in the UK by SATRA and packaged with a Certificate of Conformity.

Description	Part #	MSRP
X25 Long Sleeve Orange	SS-1311252000	\$ 55.00
X25 Long Sleeve Yellow	SS-1311162000	\$ 55.00
X25 Short Sleeve Orange	SS-1310252000	\$ 45.00
X25 Short Sleeve Yellow	SS-1310162000	\$ 45.00

The **CAMBO V5 Chest Harness** gives increased comfort and performance for aiding the progression of your SRT climbing system. Fully adaptable to any body size due to the dual adjustment system both for Torso height and Torso width. Specifically designed with an open front V System to alleviate discomfort around the neck and throat region. Fitted with 5 upper front loops and one lower loop which are drawn together when needed allowing you to ultimately decide where to hook your system in.

The **STEIN SRT Foot Loop** was developed after long term testing and user feedback and is designed for the SRT climbers. Manufactured using a heavy duty treated tube webbing and a dyneema connection loop. This elasticated foot loop is easy to fit to your footwear. For added security your laces can be tied over the loop making it a semi-permanent fixture to the footwear. Small is ideal for Climbing boots up to US men's 10, medium for between US men's 8 to 11, Large for between US men's 12 and 13.

Description	Part #	MSRP

## Carbon Fiber Hybrid Pole Pruners

**30%  
Lighter!**

Introducing Phoenix's new Blue Carbon Fiber Hybrid Poles. After years of user feedback and testing, we have a pole that both exceeds in strength and durability. The carbon fiber hybrid blend provides the strength for longer stretches of poles while also providing the flexibility so it can bend further than pure carbon fiber. This creates the ultimate lightweight and durable pole. It is 30% lighter than our standard yellow fiberglass pole when comparing blank poles and only weighs 1.85 lbs for our 12' class blank pole (135" blank pole length). Comes in 1.25" diameter so it is compatible with all other phoenix ferrules and fittings.

Blue Carbon Fiber Base poles come with all the fittings and end caps, ready for a pruner head to be installed. Multiple heads are offered and to avoid confusion, part numbers are made easy by starting with the Base Pole Part number and add a "P" to the end to add a Phoenix Head, add an "M" to add a Marvin Head, or add a "B" to add a Marvin Bull head. Blank Poles do not have any fittings. Extension pole comes with male ferrule on the bottom.

\* Denotes compatibility with Marvin PH4

**PHOENIX PRUNER HEAD - 40400:** Assembled in our factory, the Phoenix Pruner Head has a cutting capacity of 1-3/4". Made of Japanese steel, the forged blade is strong and stays sharp. Since the hook acts as a second blade, that is also forged, not stamped. The length of the spring is 3-1/2", not 3". The armature has been specially designed to have a more compact maximum extension for a pruner with a 1-3/4" cut. This feature reduces entanglement in dense growth, making the pole pruning system more maneuverable. The standard-sized, diecast body fits most popular fiberglass poles. Assembled in the USA.

**NEW**

## Phoenix Pruner Upper Assembly

Modular assembly makes replacement of commonly worn parts a breeze. Includes pre-assembled blade, spring pins, link, armature, pulley, and spring. No riveting required, can be installed with basic tools. Two bolts secure it in place, the center bolt and pivot bolt. Fits Phoenix Brand Pole Pruner Heads.

## Hand Saws and Replacement Blades

All Phoenix saws and saw blades start with steel forged in Japan, with triple-cut profile, impulse-hardened teeth, and hard chrome plating. Impulse-hardened teeth stay sharp without making the entire blade brittle and prone to breaking. The tri-edged teeth provide the fastest cutting action on both forward and reverse strokes; and the angled tip makes for an aggressive cut. The gentle arc of the teeth-line helps reduce fatigue when drawing the saw. Hard chrome plating provides a smooth gliding surface on the face of the saw from toe to heel and help protect from corrosion.

### Triple Cut Saw Blades

Packaged 20/box

**42063** - Standard 13" replacement blade. Fits Phoenix 3 pole systems and 2 pole systems.

**42163** - 13" replacement blade with hook. Fits Phoenix 3 pole systems and 2 pole systems.

**42055** - 13" replacement blade. Fits Phoenix plastic and wood handle hand saws (42045 & 42047).

**42183** - 15" replacement blade. Fits Phoenix 14' Twist Lock Pole Saws.

### Triple Cut Hand Saws

**42045** - Curved Hand Saw plastic handle comes with plastic sheath. Replacement blade part # 42055.

**42047** - Wood hand saw, 13" blade. Replacement blade part # 42055

**NEW**

**42052** - Phoenix's new 210mm Folding Saw (8.25") features a pulse hardened triple chrome plated Japanese Steel blade, all steel handle with rubberized grip. Cuts in the pull stroke for control. Blade automatically locks in folded and extended position.

**42050** - 7" Folding Saw. Compact for ease of use, storage, and blade protection. Automatic locking blade in folded and extended position. Japanese Steel with flame hardened tips. Purchase individually, or 12/box, 72/case.

**42050BKT** - Bucket of 14 7" Folding Saw. Perfect for point of purchase display.

Bucket of 24 40012	40022	\$ 312.74

## 3/4" PRO Hand Pruner with Comfort Grip

Phoenix's Black and Gray Hand Pruner starts with SK-5 steel forged in Japan. We use high-carbon SK-5 that has been highly tempered and forged in high temperature furnaces for strong blades that will stay sharp. The diecast handles feature rubber bumper pad to absorb energy and ergonomic rubber grip inserts for comfort across the palm of your hand and the metacarpals. The radial compression of the volute spring makes the spring resistant to buckling. The spring is plated to prevent corrosion.

## Hedge Shears

Phoenix's Professional Grade Hedge Shear. Our affordable version features hard-chromed blades, with plated ferrules. The wooden handles are made from ash wood which is sourced from the USA. Like expensive models, our forged 11" blades feature a blade notch for cutting branches and forged-in knurled lock texture for the locking wing nut which helps prevent loosening over time. Listen to the "WHISH" sound it makes when the blades close; that's precision cutting action! Made in Taiwan.

Forged-in knurled lock texture for the locking wing nut which helps prevent loosening over time. Replacement bolt & nut available.

Our forged 11" blades feature a blade notch for cutting branches.

Description	Part #	MSRP
Professional Hedge Shears	43110	\$ 83.25
Hedge Shears Replacement Bolt & Nut	43110B	\$ 10.80

## Machetes

The **47103** is our most popular machete featuring a 24" long high-carbon steel blade for wide cutting swath. The plastic handle has a crosshatched texture for a sure grip.

**47105** - Combo package which includes a 24" machete and sheath.

The **47102** is a smaller version of the 47103 with the blade measuring 18".

**47104** - Combo package which includes an 18" machete and sheath.

Description	Part #	MSRP
24" Machete	47103	\$ 11.20
24" Machete with Sheath	47105	\$ 31.72
18" Machete	47102	\$ 10.51
18" Machete with Sheath	47104	\$ 30.64
18" HD Machete with Wood Handle	47122	\$ 19.99

The **47122** is an 18" Heavy Duty Machete. The oversize blade (18" x 3-5/8") provides the ideal amount of heft for heavy duty cutting. Triple-riveted wooden handle.

## Weeding Tools

### WOOD HANDLE HAND MATTOCK -

**46150:** Our Wooden Handled Hand Mattock features a welded three-pronged fork on one side for breaking up compacted earth, aerating soils, cultivating, and raking. The blunt blade on the other side is great for digging and furrowing.

### METAL HANDLE HAND MATTOCK:

Our Steel Handled Hand Mattocks are made of welded steel for durability. The Three-Prong Metal Handle Planting Mattock features three prongs for cultivating and an adze on the other side. Foam grip for comfort is textured for secure feel. The One-Prong Metal Handle Planting Mattock features a blunt blade on both sides welded securely to the metal handle; a great balanced feel for digging and furrowing.

Description	Part #	MSRP
3-Prong Wood Handle Planting Mattock	46150	\$ 13.95
1-Prong Metal Handle Planting Mattock	46100	\$ 11.92
3-Prong Metal Handle Planting Mattock	46300	\$ 11.92

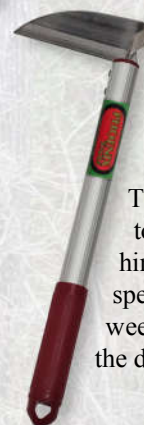

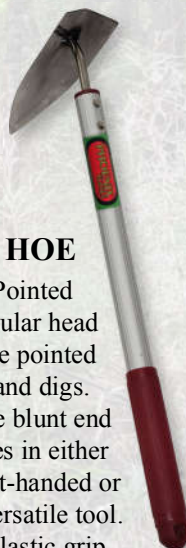

### 14" HAND WEEDER

- **46095:** The Phoenix Weeder has the classic design with an enlarged blade designed to conquer the nuisance weeds and grasses of Southern California lawns and flower beds.

### TRIANGLE HAND HOE

- **46120:** The Phoenix Pointed Hand Hoe features a triangular head and a 15" long handle. The pointed tip pierces the soil crust and digs. Rotate 180 degrees and the blunt end furrows. Rotate 90 degrees in either direction and use as a right-handed or left-handed hoe. A very versatile tool. Aluminum handle and plastic grip.

### RIGHT HANDED HOE - 46124:

The Phoenix Right-Handed Hoe features a 12" long handle. The 4-1/2" wide head is offset to the left to easily reach behind plantings. Also allows for speedy weeding: the right hand weeds while the left hand clears the debris. Aluminum handle and plastic grip.

### HALF MOON HAND HOE - 46122:

The Phoenix Half-Moon Hand Hoe features a 15" long handle for further reach. The 5-3/4" wide head is ideal for single-handed operation. Aluminum handle and plastic grip.

Description	Part #	MSRP
14" Hand Weeder with Forged Blade	46095	\$ 8.38

## Carbon Steel Plastic Rake

### PHOENIX EASY RAKE PRO: Spyder Manufacturing's Phoenix

Easy Rake Pro Rakes are well known for their distinctive silver-colored tines and forest green-colored plastic frame, as well as their durability and economy. Unlike most all-steel constructed rakes that disintegrate after losing a single tine, the injection molded hard plastic frame and retention band keep the remaining tines intact, even after losing a few tines. Measuring 18" wide, with 25 tines, it's our longest lasting and best selling lawn rake. Compatible replacement handles part #'s: 43100, 43050, 43102, 43297.

## Bow Rake

**BOW RAKE - 48414:** New for 2025, the 14 steel teeth have the right curve and width for de-thatching, as well as for raking heavier yard debris. Flip the head over and the flat side is ideal for leveling. The face is curved just right to grab soil when pulling and distribute soil when pushing; great for mulch and other organic fertilizers. 60" metal handle.

<i>Description</i>	<i>Part #</i>	<i>MSRP</i>
◆Bow Rake with 60" Metal Handle	48414	\$ 32.08

## Landscape Rake

Phoenix Landscape rakes are constructed of lightweight aluminum heads and braces. The solid heads feature 2-1/2" long teeth, spaced every inch. With 60" metal handle. Replacement handle available.

<i>Description</i>	<i>Part #</i>	<i>MSRP</i>
◆18" Landscape Rake	48238	\$ 60.38
◆24" Landscape Rake	48250	\$ 85.25
◆30" Landscape Rake	48249	\$ 85.25
◆36" Landscape Rake	48251	\$ 85.25

## Spring Back Rake

Essential for keeping xeriscapes well groomed, our Phoenix Spring Back Rakes feature 24 tines spanning a width of 22". The gentle drag of the long tines removes debris but leaves the rock and gravel landscape features in place.

<i>Description</i>	<i>Part #</i>	<i>MSRP</i>
◆24T Spring Back Rake w/54" HD Red Metal Handle	48559	\$ 20.99
◆24T Spring Back Rake w/54" HD Wood Handle	48557	\$ 20.99
24T Spring Back Rake Head	48556	\$ 15.96

## Standard Cultivators

The diamond-shaped prong tip is ideal for the most delicate work around plants, with its curved end. The diamond-shaped tip aids in breaking up tough soils. The distinctive “question mark” curved shank aids in reaching behind plants with better user balance than a plain hook-shaped shank.

**1 PRONG CULTIVATOR - 45301:** 54” metal handle.

**2 PRONG CULTIVATOR - 45302:** 60” metal handle.

**3 PRONG CULTIVATOR - 45303:** 60” metal handle.

<i>Description</i>	<i>Part #</i>	<i>MSRP</i>
◆1-Prong with 54" Metal Handle	45301	\$ 17.06
◆2-Prong with 60" Metal Handle	45302	\$ 22.18
◆3-Prong with 60" Metal Handle	45303	\$ 26.78

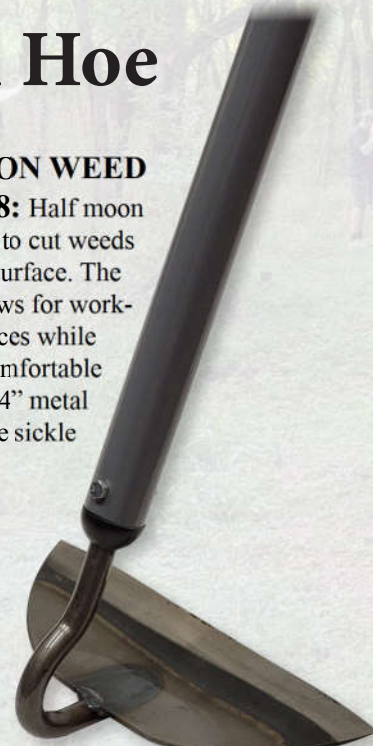

## Professional Garden Hoe

### TRIANGLE WEED HOE - 45306:

Triangular head hoe with stainless steel head. Each side of the triangle has a function. The pointed end pierces through the most hardened soils. Rotate the tool ninety degrees to cultivate beneath even the lowest growing leaves; with the tapered edge, it's no problem. Finally, use the blunt end, opposite the pointed end to furrow. A very sturdy tool that also works great around the most delicate plantings. 54” metal handle.

### HALF MOON WEED

**HOE - 45308:** Half moon head hoe. Used to cut weeds just below the surface. The curved blade allows for working in tight spaces while maintaining a comfortable work position. 54” metal handle, 8 3/8 wide sickle blade.

<i>Description</i>	<i>Part #</i>	<i>MSRP</i>
◆Triangle Head Hoe Metal Handle	45306	\$ 18.32
◆Half Moon Garden Hoe Metal Handle	45308	\$ 39.90

# PHOENIX TOOLS

## Scoring Hoe

**SCORING HOE:** The Phoenix Scoring Hoe uses the moving action of the head to maximize efficiency, without a swivel hinge to wear out. Great for weeding, the stirrup-shaped scoring head slips under the surface of the soil to cut the weed. The Phoenix Scoring Hoe is also great for tilling. Comes with either a 60" metal handle or 54" wood handle. Packaged six per bundle. Replacement head assemblies available, part # 44355, comes with 2 bolts for mounting.

## Garden Hoe

### GARDEN HOE -

**45300:** The classic gardening tool used for weeding, breaking up packed soil, furrowing. With a 7" blade and 60" metal handle.

Description	Part #	MSRP
♦Scoring Hoe with 60" Metal Handle	45356	\$ 17.20
♦Scoring Hoe with 54" Wood Handle	45357	\$ 17.20
Rep. Scoring Hoe Head	44355	\$ 9.09
♦Garden Hoe with 60" Metal Handle	45300	\$ 20.75

## Scoop Shovels

**ALUMINUM SCOOP SHOVEL:** comes with fiberglass handle attached to an aluminum scoop head measuring 13" wide at the front lip and 5" deep at the back of the scoop. Available handles in wood, fiberglass, or D-Handle fiberglass.

**PLASTIC SCOOP SHOVEL:** comes with fiberglass handle attached to a polypropylene scoop head measuring 14" wide at the front lip and 6" deep at the back of the scoop. Available in long handle fiberglass or D-Handle fiberglass

Description	Part #	MSRP
♦Alm. Scoop with 48" Fiberglass Handle	45624	\$ 72.65
♦Alm. Scoop with 32" Fiberglass "D" Handle	45623	\$ 72.65
♦Alm. Scoop with 48" Wood Handle	45625	\$ 80.10

Hemmed edges!

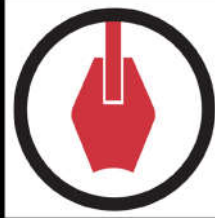

### Arm Sleeves

Lightweight and great sun protection! Custom Sleeves available! Call for more information.

# THE SLAMMERTOOL

SIMPLE MADE STRONG

**The Slammer tool** is a multi-tool combining a sledgehammer impacting on a digging bar and an axe head.

It is an efficient and inexpensive manual option to heavy machinery equipment or herbicide use. Ideal for working in tight spaces where machinery or other tools cannot easily reach.

The simple, solid construction ensures a tool built to last and endure robust use.

## How it works:

The Slammer tool uses the downward force of the inner bar to slam the cutting blade through tough ground, soil, roots - even wood and concrete.

The slide-hammer action gives you the advantage of applying a lot of force to the same spot, over and over again. This means it performs with more precision and accuracy than other conventional tools.

It allows you to maintain an upright body position and use your core strength - no twisting or swinging.

The diamond-shaped blade allows for easy removal once in the ground - simply rock from side to side to dislodge.

The Slammer Tool is favored by many professional landscapers, botanical gardens and park departments for its simplicity, durability and ease of use. Simple landscaping jobs can become difficult when there is a rock, root, hard ground, or buried concrete in the area you want to dig. With the Slammer tool you can deal with tough jobs much more efficiently and with less strain on your back.

- Make plants happier with bigger, well aerated holes.
- Use less energy to work smarter, not harder.
- No twisting or swinging. Use core strength and maintain upright posture.
- Precision digging - accurately hitting the same spot again and again

## Additional Uses:

- Planting Trees and Plants
- Transplanting
- Removing Flax, Bamboo and Large Grasses
- Removing Stumps
- Digging
- Removing Woody Weeds
- Breaking Concrete
- Digging Post Holes
